TECHNICAL SKILLS

STRONG: JavaScript (ES5, ES6), jQuery, React JS, AJAX, Rest based Web API, HTML5, CSS3, Bootstrap, MVC, OOP, CodeIgniter

EXPERIENCED: PHP, MySQL, Node.js, CoreJava, AWS, Selenium Web Driver, Agile methodologies

TOOLS: Version Control (Git, GitHub), Task tracking (Meister Task), Visual Studio Code, Debugging (Postman, Chrome Dev Tools), Design (FIGMA), Tomcat Apache server, MS Word, Excel, PowerPoint

PROFESSIONAL EXPERIENCE

Web Developer | Assured Performance Network 2020 - Present

- As a **LAMP** Full Stack Developer add new features to the existing website, fix the frontend and backend issues
- Implement knowledge of **JavaScript**, **MySQL** and **PHP** using **CodeIgniter** framework to develop, maintain multiple web applications for new and returning customers

Front End Developer | SetSchedule 2020

- Developed the frontend of real estate web application using **React JS** and **Bootstrap**

Software Engineer | Infosys 2005 - 2009

- Developed a core banking product by Infosys called Finacle which provides digital functionality tailored for ICICI Bank
 - Built the front end of the application in **Java**
 - Developed **detailed design documents** and Unit test plans
 - Performed **Unit Testing** and **Integration Testing** of web applications to ensure smooth functionality
 - Followed and contributed in Software Development Process that includes elements of planning, estimation, gathering and analyzing requirements, developing concepts and designs, implementation, developing and executing test plans and engaging in design reviews.
-

APPLICATIONS DEVELOPED

LOCAL SPORTS, [GitHub](#) [Live](#)

- A full stack **LAMP & React** mobile application which based on the specific sport search gives the user information about the sport events, event details, and reviews of each event.
- Implemented **React** to develop the frontend utilizing **Google API** to render the map view
- Created and stored data using **MySQL** and retrieved data from backend using **PHP**
- Applied **Bootstrap4** for styling and designing **mobile responsive** layout

KITCHEN SHOP, [GitHub](#) [Live](#)

- A full stack **LAMP & React** shopping cart application where a user can view the products for sale, add a desired product to their cart, and place an order
- Implemented **React** to develop frontend allowing user view and purchase the products
- Produced endpoints using **PHP** to retrieve kitchen product data from the **MySQL** database
- Applied **Bootstrap4** for styling and designing responsive layout

NINJA MATCH, [GitHub](#) [Live](#)

- Ninja inspired memory match game with statistic tracking and sound effects
 - Developed using procedural programming and **jQuery** to interact with the DOM
 - Applied **HTML5** to create basic skeleton and **CSS3** for frontend styling
-

EDUCATION

Jawaharlal Nehru Technological University | Hyderabad, India

B.S | B.Tech in Computer Science & Engineering

LearningFuze Accelerated Web Development Program | Irvine

Total of 800+ hours of programming in a simulated work environment developing full stack applications under the mentorship of senior developers
